

# Zenith 701 Project

\$12,900

Nose tank and instrument panel.  
See available fully wired panel below.

Rudder pedals and brakes installed

baggage compartment

Empennage installed

Inside fuselage looking towards the tail

Flaperon controls painted and installed

Misc box of parts needed to finish project

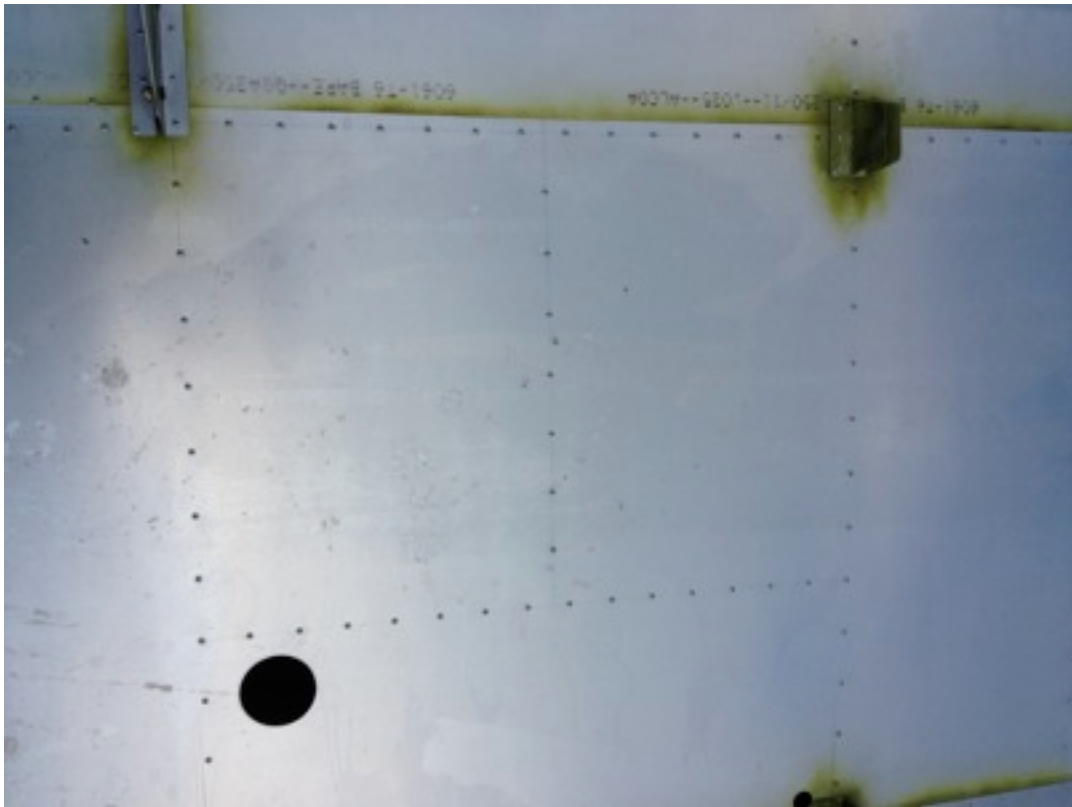

Flaperon control covers

Factory hardware box

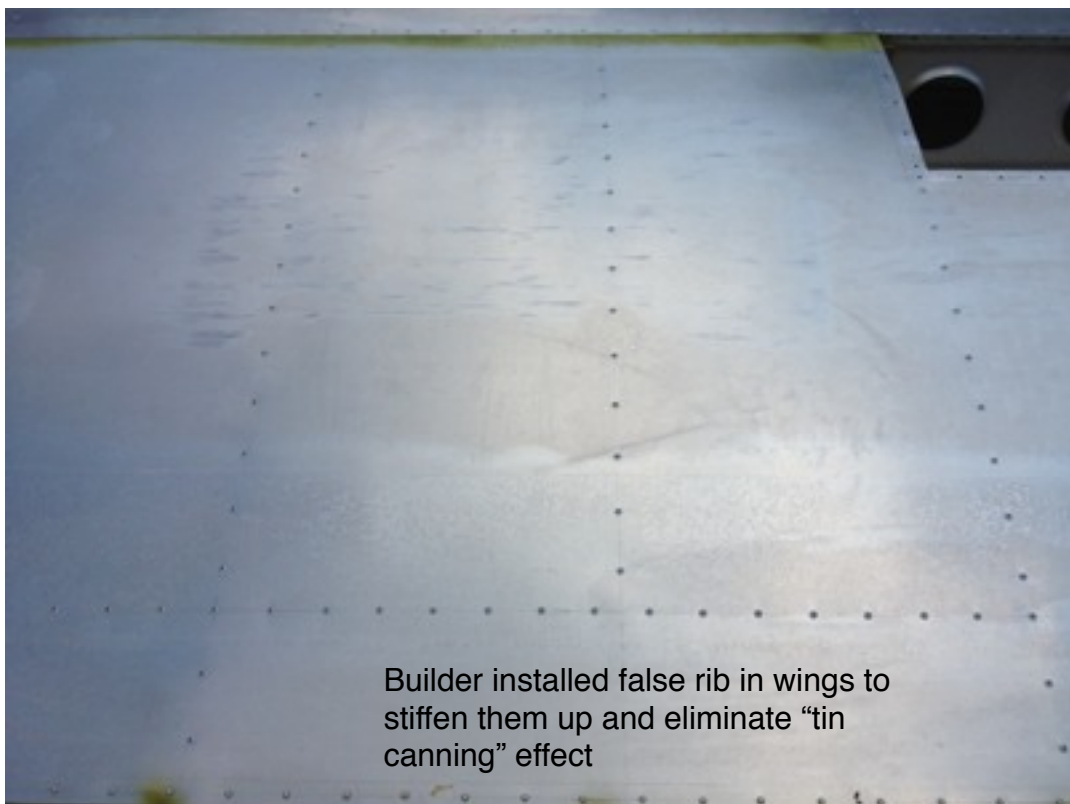

Wing tank compartment. Note: I have a set of larger wing tanks available if someone wanted to remove nose tank and put in larger wing tanks.

Builder installed false rib in wings to stiffen them up and eliminate "tin canning" effect

Slats complete and ready to install

Flaperons complete and ready to install

Panel as removed from another Zenith 701. Has wood grain sticky paper that in my opinion needs to be removed.

Pulled all wiring with panel all the way to the nav light on the tail. Should be an easy install.
